

Crestron Module

Interface for Crestron Building Automation Solution

Today's commercial buildings comprise more technology than ever before, and all these systems need to be networked, managed, and controlled in fundamentally new ways. The Crestron solution provides software and hardware solutions to faithfully handle everything from boardroom AV and automatic window blinds to total building management.

The Crestron Module for smartSMS-NET sound masking system allows adjusting the sound masking and music volume of any zone from the system through the globalized Crestron Building Management Solution.

Specifications	
Compatibility	Crestron 3-Series Control System
Communication	TCP/IP (Static or Reserved)
Functions	Increase/Decrease Masking Volume Increase/Decrease Music Volume
