

SMS-HDN Mounting Bracket

HDN Mounting bracket

The SMS-HDN is a vibration transducer that creates sound masking by generating vibrations on a hard surface. Unlike surface or direct-field speakers, the SMS-HDN does not create acoustical hot spots, providing a significantly more diffuse sound field for excellent sound masking uniformity.

The HDN Mounting Bracket is used to install the HDN transducer before the installation of drywall and hold it in place during the construction phase. After the drywall is installed, the HDN Mounting Bracket will hold the HDN Transducer and provide enough force to keep a good contact.

Specifications	
Weight	365g (0.80 lbs)*
Size	444 x 150 mm (17.7x6")
Thickness	20 gauge steel , 0.9mm
Material	Stainless Steel
Accessories	2 Self Tapping Screws 6-20 5/16"
Shipping Weight (20 units)	7.9 kg (17.5 lbs)
Box Dimensions (20 units)	61 x 48 x 18 cm (24x19x7")
