

SMS-SK-VC

Sound Masking System Speaker Volume Control Knob

The smartSMS-NET controllers are equipped 2 inputs for volume control knobs which can control sound masking and/or music on any given zone or group of zones. When a volume control knob is required for a limited subset of speakers, a volume SMS-SK-VC volume control knob can be used directly on the speaker line.

Specifications	
Wall Plate	Decora, 1-gang
Colors	White, Black, or Almond
Connector	Screw-on
Recommended Wiring	22AWG-2 Shielded

Wiring Instructions

Use 22 AWG shielded cable to connect the SMS-SK-VC on a speaker line. Connect the “in” connectors from the SMS-SK-VC to the feeding speaker line. Connect the “out” connectors from the SMS-SK-VC to the volume controlled speaker line.
